

MARK MOTTIAN

Junior MERN Stack Developer

Johannesburg, South Africa | mark.mottian@gmail.com | [linkedin.com/in/mark-mottian](https://www.linkedin.com/in/mark-mottian)
github.com/Mark-Mottian | mark-mottian-portfolio.onrender.com

PROFESSIONAL SUMMARY

Junior MERN Stack Developer building full stack applications with React, JavaScript, Node.js, Express, MongoDB, Java, SQL, Docker, Git and Render. Former medical doctor transitioning into software development, with experience in structured problem solving, documentation, communication and working under pressure.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML, CSS, Bootstrap, React Bootstrap, Formik

Backend: Node.js, Express.js, REST APIs, JWT authentication, Java, JDBC

Databases: MongoDB, Mongoose, MariaDB, SQL

Tools: Git, GitHub, Postman, Docker, Docker Compose, Render, VS Code, Eclipse

Concepts: CRUD, authentication, protected routes, responsive design, API integration, relational database design, deployment

PROJECTS

MarkItDone: Full Stack Task Management App

React, Node.js, Express, MongoDB, JWT, Bootstrap, Docker, Render

Live: markitdone.onrender.com | GitHub: github.com/Mark-Mottian/markitdone

- Built and deployed a MERN task management app using React, Node.js, Express, MongoDB and JWT for registration, login, protected dashboard routes and account based task management.
- Implemented email verification, password reset, account deletion, backend validation, loading states, error handling and confirmation modals.
- Used HTTP only cookies, React context, protected routes and a single service Render deployment where the Express backend serves the built React frontend.

iTunes Search Favourites: React and Express API App

React, Express, Node.js, REST API, JWT, Formik, localStorage, Docker, Render

Live: itunes-search-favourites.onrender.com | GitHub: github.com/Mark-Mottian/itunes-search-favourites

- Built and deployed a React and Express app that searches the iTunes Search API through a backend proxy instead of calling the external API directly from the frontend.
- Added Formik search validation, localStorage favourites, JWT middleware, REST API routes, Docker configuration and Render deployment.

PoisePMS: Java and SQL Project Management System

Java, JDBC, MariaDB, SQL, Docker Compose, Javadoc

GitHub: github.com/Mark-Mottian/poise-pms-java-sql

- Built a Java console application connected to MariaDB using JDBC, SQL queries and prepared statements to manage construction project records.
- Designed a relational database structure linking projects to customers, architects, contractors, structural engineers and project managers through foreign key relationships.
- Implemented project CRUD, person management, incomplete project filtering, overdue project search, project finalisation, SQL setup files, Docker Compose and Javadoc documentation.

PREVIOUS EXPERIENCE

Medical Doctor: Internship and Community Service

South Africa | 2023 to 2025

- Worked in hospital and emergency settings requiring clear documentation, rapid problem solving, structured handovers, teamwork and accountability under pressure.
- Managed complex information, prioritised urgent tasks and communicated with patients, colleagues and multidisciplinary teams.

EDUCATION

HyperionDev: Full Stack Web & Software Engineering Bootcamp | 2026

University of the Witwatersrand: Bachelor of Medicine and Bachelor of Surgery | MBBCh | 2017 to 2022
